Dear Duke Alumni and Friends:

“Everything wears an aspect of unreality,” Ernest Shackleton wrote. “Icebergs hang upside down in the sky, the land appears as layers of silvery or golden cloud, cloud banks look like land, and icebergs masquerade as islands.” Discover how normal human scales and reference points disappear amid the grandeur of nature in its most pristine form. From the long sunrises that paint the icescape in soft shades of pink and gold to the lingering light of the austral summer, humpback whales, leopard seals and Adélie penguins mingle amid glimmering turquoise glaciers and sparkling icebergs. Antarctica’s spectacular illuminations reveal the contrasts and marvels of the most unique place on Earth to those fortunate enough to visit.

Retrace the sea-lanes traveled by storied explorers Ernest Shackleton, Roald Amundsen and Robert Falcon Scott as they sought out the final frontier of “The White Continent” on this extraordinary 14-day program featuring a nine-night cruise aboard the exclusively chartered, state-of-the-art, Five-Star, ice-class M.S. LE BORÉAL (launched in 2010), one of the finest vessels plying Antarctic waters. The custom-crafted M.S. LE BORÉAL showcases private balconies in 95 percent of the all ocean-view, deluxe accommodations, encompasses a new generation of ship design and technology and sets the highest standards in elegance and comfort.

Your Antarctic adventure will be enhanced by a comprehensive schedule of exclusive and specially arranged lectures. Joining you is Duke Professor Andy Read Ph.D., whose research for Duke’s Nicholas School of the Environment and Duke Marine Lab has taken him to the region several times. His depth of knowledge and experience will provide an educational perspective of the highest caliber. In addition, the onboard expedition team of expert naturalists will guide you on excursions aboard sturdy Zodiac craft to explore the intricate ecosystems and marvelous nuances of the abundant wildlife found ashore, especially penguins and seals, who are unafraid of humans.

Explore Antarctica now with this comprehensive educational program and optimal cruising experience. This exceptional travel program sells out year after year, so I urge you to make your reservation soon, while Early Booking Savings and space are available.

Forever Duke,

Wildlife Conservation

The unique international Antarctic Treaty protects Antarctica's wildlife and its natural habitats and provides a guide for visitors to this great continent, where no country has sovereignty.

To protect the fragile Antarctic environment, all travelers will go ashore in small groups, so as not to over visit rookeries, disturb nesting sites or disrupt research. All visitors will be asked to take—and leave—nothing ashore.

ANTARCTICA

plankton and krill brought to the surface by the cold Antarctic currents merging with the warmer waters of the South Pacific and Atlantic Oceans. The expedition team of naturalists will present insightful lectures to prepare you for your first landing in Antarctica.

Cruising Antarctica Sunday, January 31 to Friday, February 5

The ship cruises below the 60th parallel to the outer shores and islands of the Antarctic Peninsula, Earth's last frontier. Here, explore some of the world's most pristine wilderness, where towering mountains of ice and lava create precipitous coastlines and islands, and constantly changing patterns of ice stretch as far as the eye can see. In this seemingly harsh environment, a vast array of marine wildlife flourishes, including millions of penguins, countless seabirds and thousands of seals and whales. From spectacular volcanic topography and majestic glaciers to fascinating wildlife and historic outposts, this itinerary reveals the highlights of the region for the complete Antarctic experience.

Please note that the ship's cruising pattern and positionings are dependent on weather, ice and sea conditions and are subject to change.

One of the smallest but most beautiful of the South Shetland Islands, **Half Moon Island**, is a crescent-shaped isle known for its craggy volcanic rock formations and tranquil lagoons. It is also the site of Cámara Station, a base monitored by Argentine biologists studying regional wildlife. Here, observe the antics of the island's

colony of chinstrap penguins and enjoy the lingering twilight of the Antarctic summer.

Deception Island is actually the rim of a massive dormant volcano crater that encircles a caldera known as Port Foster, where the ship enters through dramatic Neptune's Bellows, a sublime harbor ringed by snowcapped peaks and sheer cliffs. In **Pendulum Cove**, see the steaming, geothermally heated waters of the Antarctic. Observe the amazing colony of tens of thousands of chinstrap penguins at Baily Head. Then walk along the black sand beaches of Telefon Bay to nearby craters, which offer fascinating insight into the volcanic activity that created the island and played a pivotal role in the natural history of the region.

In **Paradise Bay**, awesome cliffs of ice descend from the surrounding mountains into the floating iceberg-laden waters along the western coast of the Antarctic Peninsula. Named by 19th-century whalers who sought shelter in its coves, Paradise Bay is an ideal sanctuary for marine wildlife including humpback whales, crabeater seals and Cape petrels. Listen for the low rumbling of Rudolf Glacier as it calves chunks of ice into **Neko Harbor**, named for an early 20th-century whaling boat. The harbor is surrounded by soaring glaciers and snow-covered mountains and is one of the most dramatic and spectacular sights in Antarctica. Here, make your first "continental landing" in Antarctica.

Cruise through breathtaking, glacier-lined **Neumayer Channel** to **Port Lockroy**. Originally constructed in 1944 by an eight-man team as an intelligence post for British espionage during World War II, Port Lockroy was converted into a whaling station and scientific base in the 1950s. It is nestled among glistening

In contrast to sociable Adélie penguins, who congregate in large colonies, the leopard seal cherishes his solitude and independence.

A visit to Antarctica offers an unparalleled opportunity to get an up-close view of chinstrap penguins in their natural habitat.

mountain peaks as high as 6000 feet, and the surrounding grounds are populated by blue-eyed shags and gentoo penguins. Gain insight into the lives of past explorers at the British Antarctic Survey Museum and mail a postcard stamped with an Antarctica postmark from the official British Post Office. Just beyond Port Lockroy, enjoy an excursion to the rocky shores of **Jougl Point on Wiencke Island.**

Experience this rare opportunity to view the nearly intact skeleton of a full-size blue whale, and see populous colonies of gentoo penguins and kelp gulls.

Flanked by sheer cliffs of towering glaciers between the Antarctic Peninsula and

Booth Island, **Lemaire Channel** offers views of seven majestic miles of mountains and wildlife combined with fascinating patterns of ice floes. Call at **Petermann Island**, the southernmost point of your journey, and watch its thriving rookeries of Adélie and gentoo penguins and blue-eyed shags.

Cruise the **Weddell Sea** and see the enormous tabular icebergs that have calved from the Larsen Ice Shelf. See **Brown Bluff's** spectacular 2450-foot-high promontory jutting into the Antarctic Sound. Observe the area's flourishing colony of friendly Adélie penguins, who may approach you for an up-close encounter.

Cruising Drake Passage/ Cape Horn, Chile

Saturday, February 6
Relax and reflect on board as the ship turns north and crosses the Drake Passage. Enjoy lively, informative discussions with the ship's naturalists. Watch for endangered albatross and the many different species of petrels as you cruise across the Antarctic

Convergence and past **Cape Horn**, the southernmost point of South America and a milestone on world trade routes from the 18th century until the opening of the Panama Canal in 1914. Attend the Captain's Farewell Reception this evening.
